

Lean Inception

caroli.org

Lean Inception is the effective combination of Design Thinking and Lean StartUp to decide the MVP. It is a collaborative workshop divided into several stages and activities that will guide the team in building the right product.

About the MVP

The MVP, short for Minimum Viable Product, is the simplest version of the product to be made available to users to validate business hypotheses.

Facilitation techniques

The formation and group communication approach should vary according to the moment of the workshop and the style of each activity. In some situations, everyone needs to be involved in the same conversation, but in others, this is not effective. Here are some suggested techniques:

Divide and Conquer

Fishbowl Conversation

Person in the spotlight

Pomodoro

Tell and Cluster

Everyone talks and contributes

You do it, I do it too, then we compare it

Individual Brainstorm

Voting

Credits

This template arises from the need to transform a very successful presential workshop into a very effective remote workshop. Its elaboration is based on the practical experience and collaboration of many people who facilitates Lean Inception.

Kickoff

The Lean Inception starts with a kick-off, followed by a sequence of intense activities, and ends with a workshop showcase. The team directly involved with the initiative must participate in all activities; the other interested parties must participate in the kick-off and the showcase, where the expectations and results obtained in the workshop are presented, respectively.

Think big, start small, learn fast!

- 1** Ask the main sponsor of the initiative to open the Lean Inception with a speech about the initiative to be launched on.
- 2** Make a brief presentation about the Lean Inception agenda and the concept of MVP.
- 3** Ask everyone to write their names, using the color that identifies the level of participation.

Parking-lot

The Parking Lot helps to momentarily park conversations, ideas or questions that are raised during a conversation but are not useful for discussion at that specific time. It is an essential tool for the facilitator at any time during the workshop, as it is a polite way of saying: "yes, I heard you, but this conversation is for later".

Glossary

Take advantage of the Lean Inception to validate, adjust and give visibility to the vocabulary of the domain. It is very important that everyone involved - business, technology and user representatives - communicate and register the generated artifacts with a common language. Make sure to check the understanding of each word in the domain, and place it in the Glossary, visible to everyone.

SELF SERVICE

Formato de restaurante em que o próprio cliente monta seu prato, podendo ser por peso (kg) ou preço fixo. No contexto deste restaurante, opera no modelo de preço fixo por pessoa.

BUFFET LIBERADO

Modalidade de serviço em que o cliente serve a si mesmo com acesso ilimitado a todas as opções disponíveis no buffet, pagando um preço fixo por pessoa.

VOUCHER

Crédito pré-pago que permite ao cliente ou presenteado usufruir de um buffet liberado em data futura, sem necessidade de pagamento no local. Válido por 6 meses.

Product Vision

Somewhere between the idea and the launch of the MVP, the product vision helps you to walk the initial path. It defines the essence of your business value and should reflect a clear and compelling message to your customers. This activity will help you to define the product vision in a collaborative way.

With a clear view of the product, you can determine how the initial "pieces" of the business will come together.

- 1 Divide the team into three groups and request that each group fill only the blanks selected in its respective template.

- 2 Ask each group to read their respective incomplete sentence and copy their part(s) to the single template.

- 3 Ask the team to consolidate a homogeneous sentence, copying or rewriting the previous notes, as needed.

The Product IS - IS NOT - DOES - DOES NOT DO

It is often easier to describe what something is not or does not do. This activity seeks classifications about the product following the four guidelines, specifically asking each positive and negative aspect about the product being or doing something.

Deciding what NOT to do is AS IMPORTANT as deciding what to do.

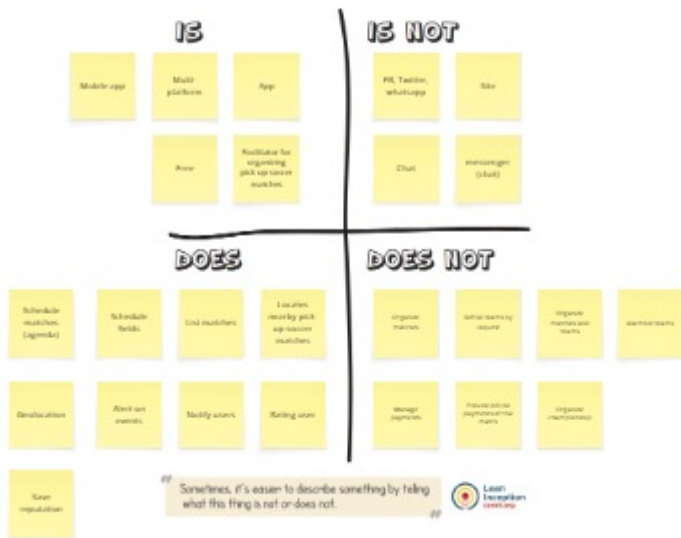

- 1 Divide the team into two groups and request that each group fill only the blocks selected in its respective template.

- 2 Ask a person to read a note. Talk about it. Group similar ones into a 'cluster' and place it on Canvas 1.

- 3 Go back to step 2, then ask the same for another person in the real group, until all notes are finished.

Activity 2: IS - IS NOT - DOES - DOES NOT DO

IS		IS NOT	
visiting an entrepreneur	Consulting services to entrepreneurs	Apprenticeship training	Trade school
Consulting services to a startup	Chart of accounting or balance	Business plan development	Business plan growth strategy

DOES		DOES NOT	
Customer relationship management	Business process or system analysis or redesign	Business process improvement or optimization	Business process optimization
Business process optimization	Business process optimization or redesign	Business process optimization or redesign	Business process optimization or redesign
Business process optimization or redesign	Business process optimization or redesign	Business process optimization or redesign	Business process optimization or redesign

20 Sometimes, it's easier to describe something by saying what it's not or does not.

IS		IS NOT	

DOES		DOES NOT

20 Sometimes, it's easier to describe something by telling what this thing is not or does not.

© 2019
The MIT Press

29 Sometimes, it's easier to describe something by taking what this thing is not or does not.

Product Goals

Each participant must share what they understand as a business goal, and the various points of view must be discussed to reach a consensus on what is really important. This activity helps in raising and clarifying the main objectives.

If you have to summarize the product in three business goals, what would they be?

- 1 Divide the team into three groups and request that each group fill only the blanks selected in its respective template.

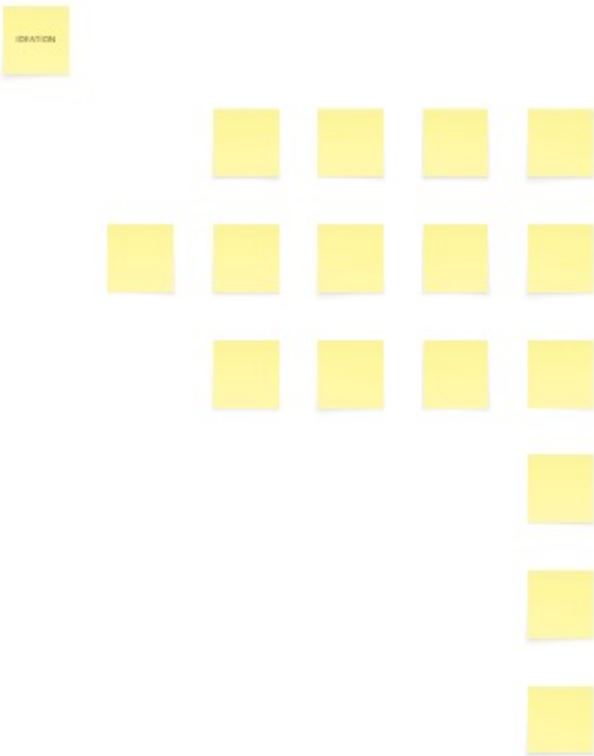

- 2 Ask participants to share what they have written, grouping them by similarity in the 'cluster'.

- 3 Define a title for each of the 'clusters'.

Activity 3: Product Goals

Construir o conteúdo	Seus meios criativa	Quitar validade	Ter mais candidatos a colaboração	Clientes	Dados
Escrever o conteúdo no google	Comprar um machine online (para os dependentes)	Escrever o site em francês, inglês, etc.	Conhecer as vagas disponíveis	Analisar modelos com modelos e promoções	
Ver lista de sites funcionando	Revisar o website por e-mail	Compartilhar o site nos redes sociais e materiais impressos	Fechar contrato pela submissão de informações pessoais	Ver depósitos de outros clientes	
Ver alternativas para a empresa	Pagar mais com cartão de crédito ou PD		Escrever o conteúdo do resto da candidatura	Analisar o site em outras idiomas (francês)	
Analisar informações sobre o projeto	Enviar o material para o site a prazo		Informar área de interesse	Analisar programa de fidelidade	
			Compartilhar com outros projetos		
			Realizar a candidatura para quem quiser colaborar		

Personas

To effectively identify the features of a product, it is important to keep users and their goals in mind. A persona creates a realistic representation of users, helping the team to describe features from the point of view of those who will interact with the final product.

A persona represents a user of the product, describing not only his/her role, but also characteristics and needs.

- 1 Divide the team into three groups and ask each to describe ONE persona.

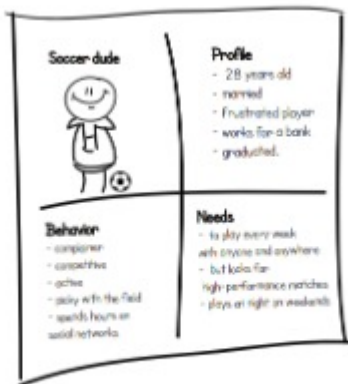

- 2 Each group presents its persona to the entire team.

- 3 Optionally, make more rounds to describe other personas. After each round, group them by similarity.

To effectively identify the functionalities of a product it is important to have in mind users and their goals.

User Journeys

The journey describes a user's journey through a sequence of steps to reach a goal. Some of these steps represent different points of contact with the product, characterizing the person's interaction with it.

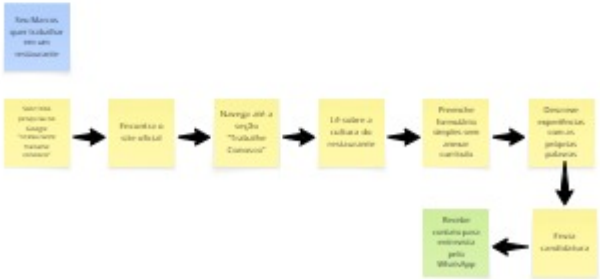

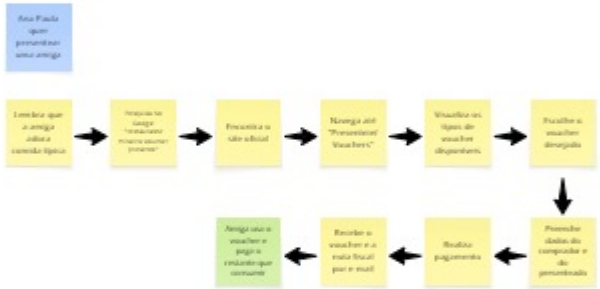

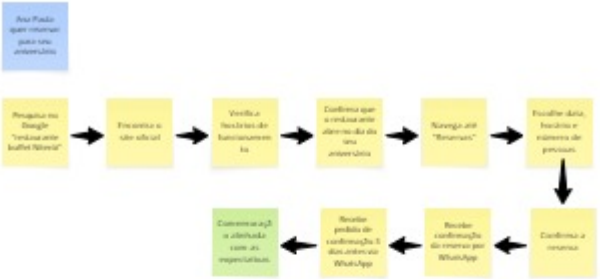

What goal does the persona want to achieve? Describe the journey step by step until the persona reaches it.

- 1 Divide the team into three groups, and ask each to describe their journey.
- 2 Each group presents its journey to the entire team.
- 3 Optionally, make more rounds to discuss other journeys.

The User Journey describes a sequence of steps a user follows in order to reach a goal.

Feature Brainstorming

A feature represents a user's action or interaction with the product, for example: print invoice, view detailed statement and invite Facebook friends. The description of a feature must be as simple as possible, aiming to meet a business goal, a persona need, and / or contemplating a step in the journey.

The user is trying to do something, so the product must have a feature for that. What is this feature?

- 1** Ask someone to read, slowly, the step-by-step of a user's journey.

- 2** While reading, when people share feature ideas.

- 3** When a feature is identified, describe it and place it on the board. Repeat the previous steps for all journeys.

Activity 6: Feature Brainstorming

Visualizar histórico de transações em tela	Continuar a história de relacionamento	Consultar localização e tempo de viagem	Entender o modelo de frete oferecido e o que está incluído	Navegar pelas condições	Assinar informações sobre todos membros
Comparar entre as opções de frete	Procurar o site pelo Google	Assinar a política de reembolso segundo período	Facilitar escolha por valor de pagamento	Realizar pagamento com cartão online	Realizar pagamento com PIX
Receber notificações por e-mail	Procurar por opções para outros produtos	Requisitar escolha no relacionamento	Receber mais detalhes da compra	Assinar página de feedback. Comentar sobre mais	Permitir feedback de qualidade com atribuição de estrelas
Navegar pelas opções de frete	Navegar seja por desktop que pelo celular	Procurar entre as opções de frete, no frete	Procurar opções de entrega e WhatsApp facilmente	Visualizar página de checkout com opções de pagamento	Permitir acesso de qualidade de entrega de frete
Validar escolha no frete					

Technical, Business and UX Review

This review aims to discuss how the team feels about technical, business and UX understanding for each feature. From this activity, new clarifications will happen and the disagreements and doubts will become more apparent.

The colors and markings will assist the team in subsequent activities to prioritize, estimate and plan.

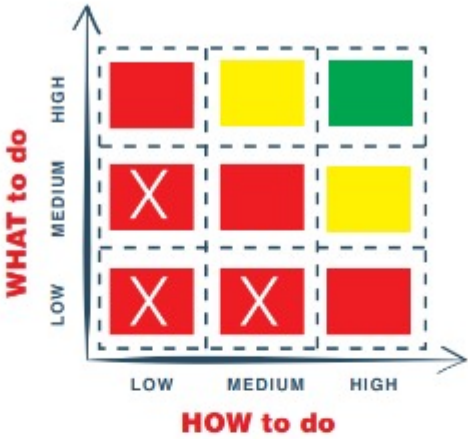

- 1 Ask a person to choose and drag a feature, going through the graph and table.

- 2 Define the color according to the confidence level and make markings (on a scale of 1 to 3) of business value, effort and UX value: 1, 2 and 3.
 

- 3 Cardview that everyone agrees; choose the next person and return to step 1.

TECHNICAL, USER EXPERIENCE AND BUSINESS REVIEW

EFFORT	E	EE	EEE
BUSINESS	\$	\$\$	\$\$\$
UX	♥	♥♥	♥♥♥

Sequencer

The Feature Sequencer assists in organizing and viewing the features and the incremental validation of the product.

Define the MVP and its subsequent increments.

- 1 Ask people to decide the first feature

- 2 Bring more cards to the sequencer. Request the rules.

- 3 Identify the MVP and the increments of the product.

RULES

Rule 1: A wave can contain a maximum of three cards.

Rule 2: A wave cannot contain more than one red card.

Rule 3: A wave cannot contain three cards, only yellow or red.

Rule 4: The total effort of the cards cannot exceed five 2s.

Rule 5: The sum of the value of the cards cannot be less than four 5s and four hearts.

Rule 6: If one card depends on another, that other card must be on some previous wave.

MVP Canvas

The MVP Canvas is a visual chart that helps the team to align and define the MVP, the simplest version of the product that can be made available to the business (minimum product) and that can be effectively used and validated by the end user (viable product).

The team has already discussed what makes up the MVP and has already talked about what is expected of it, the time has come to summarize everything.

- 1 Divide the team into two groups and ask each group to complete the MVP canvas in their respective template.

- 2 Ask each group to present their Canvas MVP.

- 3 Ask the team to consolidate the seven blocks of the MVP canvas, using and changing the previous notes as needed.

MVP CANVAS

REFERRED PERSONS Who will deliver value to your business model customer group?	MVP PROPOSAL What are the minimum features that you need to achieve traction?	EXPECTED RESULT What outcome or outcome are seeking to achieve?
